The Quick Guide to ICD-9-CM Codes is an abbreviated reference. Reporting of diagnosis codes needs to be done to the highest level of specificity including 4th and 5th digit reporting as appropriate. Certain diagnoses may require review of complete code listing. Please consult primary coding references for the full code descriptions.

ICD-9, CPT and/or HCPCS codes should be selected and used by physicians based upon the code or codes which most accurately describe the diagnosis and the procedure performed and which is consistent with the requirements of any applicable health insurers. To support compliance with insurer requirements, physicians should contact local, public or private health insurance carriers or advisors of their choice in determining the appropriate code for the services provided. Sanofi-aventis cannot and does not guarantee that use of any code or codes will assure coverage or payment at any level.
